Journal des sçavans

From Wikipedia, the free encyclopedia

The **Journal des sçavans**, a journal of the [Académie des Sciences, Paris](#), was the earliest [scientific journal](#) published in [Europe](#). The first edition appeared on Monday, [5 January](#)^[1] a few months before the *Philosophical Transactions of the Royal Society of London*, which appeared for the first time on [6 May](#).^[2]

After the [French Revolution](#) the journal became more of a literary and less of a scientific journal.^[3]

Philosophical Transactions of the Royal Society

From Wikipedia, the free encyclopedia

*The **Philosophical Transactions of the Royal Society**, or *Phil. Trans.**, is a [scientific journal](#) published by the [Royal Society](#). Begun in [1665](#), it is the oldest scientific journal printed in the English-speaking world, and the second oldest in the world, after the French *Journal des sçavans*. It is still published, which makes it the world's longest running scientific journal.

Contents [hide]

- [History](#)
- [Current publication](#)

- [External links](#)

History

The first issue was published in 1665, six years after the [Royal Society](#) had been founded. Over the centuries, many important scientific discoveries have been published in the *Philosophical Transactions*. Famous contributing authors include [Isaac Newton](#), [Michael Faraday](#) and [Charles Darwin](#). In 1672, the journal published [Newton's](#) first paper *New Theory about Light and Colours*, which can be seen as the beginning of his scientific career.

Current publication

Today, two series are being published: *Philosophical Transactions of the Royal Society A* (covering mathematical, physical and engineering sciences) and *Philosophical Transactions of the Royal Society B* (covering biological sciences). Nowadays, *Phil. Trans.* publishes theme issues and discussion meeting issues while individual [research articles](#) are published in the sister journal *Proceedings of the Royal Society*.

El surgimiento de la Internet y su consolidación a partir de 1990 con el World Wide Web

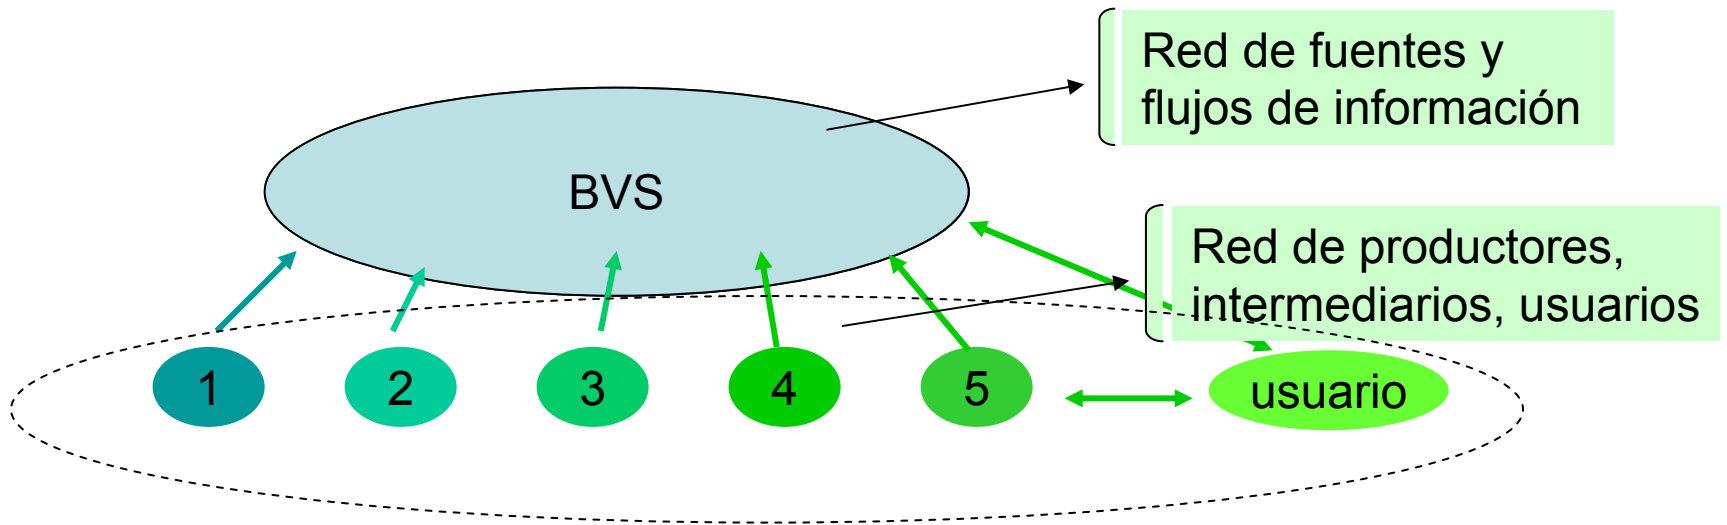

como el nuevo medio y soporte de la comunicación científica

viene contribuyendo de modo radical para que la producción del flujo de información científica y técnica se realice progresiva y predominante en red y online

La producción clásica de la comunicación científica,
que tiene el papel como medio y soporte,
opera con una estructura básica, en la cual el
proceso o flujo de trabajo en que los actores, objetos
se posicionan y operan
constituyen instancias [físicas] fijas separadas en el
tiempo y el espacio

Con la Internet, la producción del flujo de información basada en interfaces na Web ha generado un espacio virtual para el cual convergen la operación de todos los actores

Características, consecuencias y perspectivas de la producción en red online

- 1 alto grado de simultaneidad --- continuum del flujo
- 2 posibilidad real de la biblioteca universal - movimiento de acceso abierto – búsquedas avanzadas
- 3 el artículo como unidad de acceso y enriquecido de enlaces y servicios
- 4 posibilidad de varias versiones – idioma por ejemplo
- 5 hipermidia – distanciándose del papel ?
- 6 desafíos para los países en desarrollo

Características, consecuencias y perspectivas de la producción en red online

- 1 alto grado de simultaneidad --- continuum del flujo

Prevalence of violence against women users of health services.]

[in Portuguese]

de Azevedo AL, Vieira EM, Souza LD.

Departamento de Medicina de Ribeirao Preto, Universidade de Sao Paulo, Ribeirao Preto, SP, Brasil.

OBJECTIVE: Intimate partner abuse is a complex phenomenon and a public health problem and health care services are one of the places sought by women in this situation. The objective of this study was to assess the prevalence of violence against women attending a health care center. **METHODS:** This study was carried out in a municipality of Southeastern Brazil, in 2003. A sample of 265 women, aged 18 to 49 years old, was interviewed and a questionnaire administered face-to-face. Violence was classified as psychological, physical, sexual and emotional. Statistical analyses utilized were exact logistic regression and Fisher's exact test. **RESULTS:** Psychological violence, at least once in life, was reported by 41.5%, physical violence by 26.4%, and 9.8% reported sexual violence. General violence, which refers to anyone of the above mentioned types of violence, was reported by 45.3% of the women, and, in 20.3% of the cases, they stated it had occurred during the last 12 months before the interview. However, when asked whether they had suffered any kind of violence in life, only 10.2% answered affirmatively. The multivariate analysis indicated that the risk factors for each type of violence were drug use by the partner, socioeconomic status and family history of violence for both psychological and emotional violence; drug use by the partner, schooling and family history of violence for physical violence; and socioeconomic status and family history of violence for sexual violence. **CONCLUSIONS:** This study indicates that the prevalence of violence among women attending the health center is high and consistent with the results of other investigations. It also suggests that most of the violence is invisible to the health center.

Source: Seychelles Medical & Dental Journal;1(1):16-18, 1993.

Language: English.

Abstract: The first reported practice of Dentistry by an unqualified operator is that of a Mr Cocotte in South Mahé. He used to go from door to door enquiring if there any children needing extractions. Armed with a pair of forceps and a towel on which to wipe them, he charged five cents a tooth. Tradionally, local treatment for toothhache made use of the coconut and the cinnamon trees.

Citation: Levin SA (2006) Fundamental Questions in Biology. *PLoS Biol* 4(9): e300

Not so long ago, virtually every major university had a department of biology, or perhaps bookend departments of zoology and botany, which complemented physics, chemistry, mathematics, and possibly geology to form its science foundation. Biology was, at least compared to the field today, an integrated discipline, from the molecular and cellular to the ecosystem, firmly resting on Darwinian principles. Weekly colloquia drew biologists from across the spectrum, whether the topic was the genetic code, the nature of the synapse, or the Cambrian Radiation.

But biology has seen its own radiation and is just starting to catch up with this explosion. The amazing pace of advance in our understanding of biology has, perhaps unavoidably,

POLICY FORUM

SOCIAL SCIENCE: **Death in Darfur**

John Hagan^{1*} and Alberto Palloni²

Analysis of factors confounding previous estimates leads to the conclusion that hundreds of thousand of people rather than tens of thousands have died as a result of the conflict in Darfur.

¹J. Hagan is in the Department of Sociology, Northwestern University, Evanston, IL 60208, and with the American Bar Foundation, Chicago, IL 60611, USA.

²A. Palloni is in the Department of Sociology, University of Wisconsin, Madison, WI 53706, USA.

Neanderthal's last stand

Cave in Gibraltar may be most recent home of extinct species.

David Brill

Gibraltar may have been the last refuge of the Neanderthals, according to the results of a six-year archaeological dig.

The findings, which show that Neanderthals lived alongside modern humans for thousands of years, bring fresh evidence to the debate on what happened to our evolutionary

Spear points like this, discovered in Gorham's Cave, show that Neanderthals once lived here.

Signs of Neanderthal technology were first discovered close to the outside of Gorham's Cave in the 1950s, but that deeper excavations only began in 1997. These latest findings, published online in *Nature*¹ this week, are the results of work done between 1999 and 2005.

Gorham's Cave: a nice view, and plenty of food nearby.

Natural History Museum

This site appears to have been ideal for Neanderthals. "They had a whole range of resources," says Finlayson. "In spite of cooling in other parts of Europe there were typical Mediterranean plants there — wild olives and so on. They were also clearly eating a lot of marine material such as mussels. And we have some pretty good indications that they were de-fleshing marine mammals such as seals," he says.

Neanderthals' stronghold was Europe, although they also lived in parts of Asia. Previous work has suggested that when *Homo sapiens* swept up from Africa some 40,000 years ago, the newcomers displaced Neanderthals from Central and Western Europe within 5,000 years².

Gorham's Cave should provide an opportunity to understand how the transition from Neanderthals to modern humans took place. "This does suggest that in some parts of Europe they were well enough adapted to hang on, even if modern humans were in the vicinity," says palaeontologist Chris Stringer of the Natural History Museum in London, another author on the report. "How much they contacted each other remains unclear," he adds.

COMMENTS

WHAT it seems absolutely incomprehensible to me, is that these two "cousins", who lived in close proximity during 10 to 20,000 years, have not left any traces of interbreeding.

Posted by: Pau Cortes Font de Rubinat | [September 14, 2006 01:01 PM](#)

it seems that in the nothern american part there are still a lot neanderthalers who live there.

Posted by: frans-jan | [September 14, 2006 03:23 PM](#)

as a gibraltarian, i feel very proud, and i could like to congratulate nature for printing neanderthals last stand, the news was given yesterday, before the calpe o6 conference on straits, refuges and the geography of populations started and in which many important people like chris stringer,peter a. underhill, and others from spain portugal are taking part, and lasts until saturday. i could like to congratulate professor clive and geraldine finlayson, for putting gibraltar on the map, and for his academic work. thankyou again. yours sincerely c.f.beanland.

about this site

SciELO Social Sciences English Edition is a product of a joint effort of [SciELO](#) (Scientific Electronic Library Online) and the [The Edelstein Center for Social Research](#), with the support of the Open Society Institute (OSI).

centro edelstein de pesquisas sociais
www.centroedelstein.org

The objective of **SciELO Social Sciences English Edition** is to contribute to the promotion of international access to Latin American scientific journals in Social Sciences. Its main characteristic is to make available English full texts, *at no charge to the public*, in order to increase Latin America Social Sciences visibility and accessibility.

In the first phase the site will include 30 journals, from Argentina, Bolivia, Brazil, Chile, Paraguay and Uruguay. During the coming months will be added four journals monthly.

Título: Entre o sonho e a realidade: maternidade na adolescência sob a ótica de um grupo de mulheres da periferia da cidade de Maceió-Alagoas / Between dream and reality: maternity in adolescence under the vision of a group of women from Maceio city suburbs ú Alagoas, Brazil.

Fonte: São Paulo; s.n; 2005. 185 p. ilus, tab.

Idioma: Pt.

Tese: Apresentada a Universidade de São Paulo. Escola de Enfermagem de Ribeirão Preto para obtenção do grau de Doutor.

Resumo: Este foi um estudo de natureza qualitativa, que teve como objetivo compreender, a partir da experiência de mulheres que se tornaram mães na adolescência, o significado da maternidade no contexto de vida destas mães. Participaram 14 mulheres na faixa etária de 20 a 24 anos, residentes na periferia de Maceió, capital do estado de Alagoas. A coleta de informação foi realizada por meio de entrevistas, utilizando a história oral temática como procedimento metodológico. Foram construídas narrativas, a partir das histórias de vida das mulheres, posteriormente, analisadas à luz do referencial de gênero. Observamos que as entrevistadas tiveram sua iniciação sexual durante o período de namoro quando não haviam recebido orientações prévias sobre sexualidade ou saúde reprodutiva. Algumas mulheres conviviam com seus parceiros quando aconteceu a gravidez, porém, mesmo assim, consideraram esse fato inesperado. Houve aceitação da gravidez pela maioria delas, e também ocorreu a união, ainda que não de maneira legalizada, de muitos casais que não viviam juntos. Tentativas de abortamento, quando da não-aceitação imediata do parceiro, foram relatadas. As questões de gênero mostram-se presentes nas relações conjugais, com os parceiros figurando como provedores da família e as mulheres mantidas sob sua dependência, centradas no ambiente doméstico, assumindo responsabilidade pelo cuidado da casa, dos filhos e do companheiro. Os homens agiam mais livremente, mantendo relações extraconjugais e chegavam a acreditar
